# Ergonomics, function and quality

Our clothes are innovative in several ways. We put a lot of thought into function and ergonomics. The two terms go hand in hand; clothes that are ergonomically correct are also more functional. Our products both feel good and look good.

For many years, working clothes have been associated with tool vests and large trouser pockets. But carrying the whole tool box around soon wears out shoulders and hips, with resulting numbness in arms and legs. We aim to prevent physical stress injuries by distributing the weight of tools, measuring instruments, nails and screws, etc. A clever and flexible carrying system makes work safer, more efficient and more fun. You can read more about Inbags, our unique carrying system, on pages 148-149.

Work clothes have to withstand a lot of hard wear. We use strong proven materials for our clothes and subject them to rigorous scrutiny. The details on our garments look great but, also, they always serve a purpose. Areas that are especially exposed to wear are, for example, reinforced. You can read more about these details further on in the catalogue. See them as a guarantee for durability and feeling your best at work.

New times place new demands. The line between different tasks and occupational categories is starting to disappear. Flexibility, personality and professionalism are new demands. One of our basic design principles is that the clothes you work in should have a representative appearance. Every worker is a representative of the

company to the outside world.

Life is also much more than the job and the boundary between work and leisure is becoming ever more blurred. Many of our garments are also well-suited to use after the day's work has ended.

## PLEASURE

If you have fun, you improve. The clothes we work with make a big difference to our job satisfaction and efficiency. Creating job satisfaction is probably the best investment an employer can make. People who enjoy working develop both themselves and the company they work for. Feeling well-dressed and, above all, correctly dressed makes work easier and more pleasurable.

**Build your team spirit and communication with colour!**

Uniform profiled work clothes at the Company does not express only for environment that you belong to the same company, it also creates cohesion and team spirit within the company which is quite important. Projob have many different colours to choose from and we always try to ensure that the colour matching is the same whether it is a t-shirt, sweatshirt, work trousers or jacket. By selecting just your colour combination and then profile the work clothes with printing or embroidery, you can create your unique concepts or team spirit.

# Materials

## COTTON

Cotton is a soft and comfortable natural material. It insulates and ventilates. One of cotton's advantages is that it does not melt when exposed to flames and sparks and that it is difficult to set fire to. Our heavy-duty cotton twill is extra sturdy and durable. This is possible because we ourselves are involved in and direct development from fibre to final production.

## POLYESTER/COTTON

The combination of cotton and polyester have proven perfect for making long-lasting garments. The breathability of cotton combined with the durability and colourfastness of polyester make garments in polyester/cotton keep their shape and colour longer. Clothes in polyester/cotton are therefore an excellent choice for hard work that places great demands on both the wearer and the garments.

## CORDURA®

Cordura® is DuPont's brand of extremely durable polyamide material. It is three times as strong as standard polyamide, up to seven times as strong as cotton and yet is fine and supple. We use it primarily as reinforcement in places that are exposed to hard wear.

## PRO DRY™

ProDry™ are the materials you wear closest to your skin. They transport moisture and allow it to pass to the outer layer. With ProDry™ there you don't have to have damp and cold garments next to your body.

## PRO THERMAL™

Pro Thermal™ are the materials that afford effective insulation against both heat and cold. The materials detect and dispose of surplus heat at the same time that they keep out unneeded cold. Pro Thermal™ keeps body temperature at an even and pleasant level all day. Pro Vent™ are the materials with high breathability. They

## PRO VENT™

let out moisture and superfluous heat. They withstand rain, snow and wind. Pro Vent™ are resilient, protective materials worn on the very outside.

## PRO TEC™

Pro Tec™ are the materials that afford effective protection against exterior effects. They are very resistant to wear and to tearing. Pro Tec™ is suited to extremely strenuous work in rough environments.

## VENTAIR™

VENT AIR® is wind and waterproof with breathability. VENT AIR® keeps the body dry and cool while protecting against the forces of weather. The material consists of three-component high-tech weave, a functional material with a coating on the inside and a water-repellent treatment on the outside.

## Thinsulate™ INSULATION

Thinsulate insulation works by trapping air molecules between you and the outside. The more air a material traps in a given space, the greater its insulating value. Because the micro fibers in Thinsulate insulation are far finer than other fibers, they trap more air in less space, which naturally makes it a better insulator. So we haven't repealed the laws of nature with our thin insulation; we've simply obeyed them better – to your advantage.

### Features:

- Breathable
- Moisture-resistant
- Both machine washable and dry-cleanable

NANO-TEX™ is a fabric that simultaneously works to reject and remove stains. By applying this new technology on the garments, you don't have to compromise on the comfort or function to achieve this quality. The result is that we can now combine the softness of cotton and still keep our garments clean with that fresh feeling.

#### HOW DOES IT WORK?

One nanometer is one billionth of a meter. This is approximately the equivalent of the size of three to five atoms. By changing the molecular structure in the fibers we have created a fabric that results in fantastic features and outstanding comfort. We are the first to use the Nano technology in our work wear range which without a doubt will be standard necessity in our industry.

#### NANO-TEX™ – BENEFITS

Compared to normal workwear garments, the revolutionary NANO-TEX™ weave has multiple ways to prevent and fight stains. Each and every fiber has been transformed to feature a long lasting, hard wearing and exceptionally functional products.

#### Features:

- Makes it easier to remove stains
- Long lasting protection
- Remains clean and fresh longer
- Naturally soft and comfortable
- Breathable

With the Nano Technology, ProJob has taken a further step in the process of developing products, for the purpose of satisfying the needs and demands in the work wear industry.

## Material details

YKK is a market-leading brand in zippers. The products are of high quality and set the standard for other players in the market.

3M Scotchlite™ person reflex material makes you extra visible when it's dark and the view is bad. The material reflects bright white when it's lit up by the headlights of a vehicle, also when the wearer stands beside the road. 3M Scotchlite reflex material for protective garments exceeds the highest reflex category of the European standards for reflective protective garments, EN471, as well as all strict, standardised tests.

Coats epic has set a new standard in the thread market. It consists of a core of polyester fibre around which is spun yet another polyester fibre. The combination makes for a thread with maximal tensile strength, which results in seams with extreme durability.

Duraflex is the trade mark of the high-quality buckles used in ProJob clothes, belts and carrying systems.

# We work for those who work for us!

We have the possibility to contribute and make a difference through our global operations.

ProJob is a part of New Wave Group.

New Wave Group is working with social and environmental sustainability under the term CSR (Corporate Social Responsibility). As our customer, you are supporting this work.

## WE LIKE SUSTAINABLE PRODUCTS

New Wave Group believes in classic design and good quality products - a concept that will never be out-of-fashion. We hope you will enjoy our products for a long time. All products can be customized to your precise demand, which is a good way to ensure long-lasting use and sustainable consumption.

It is important to New Wave Group that our products are safe and free from restricted chemicals. New Wave Group is a member of the Swedish Chemicals Group at Swerea IVF to receive the most updated information on legislation and developments. This supports our active work to reduce and replace chemicals in line with best available technique. All our suppliers must follow the requirements in our Restricted Substance List. The list has been designed in accordance with legislations such as REACH, but also taking into account industry recommendations and standards. As a result, our requirements are often stricter than the applicable legislation.

## IMPROVING WORKING CONDITIONS

New Wave Group is never far away from the manufacturing of our products. Being represented on site enables us to have a close partnership with our suppliers and to actively monitor their business operations. We have a CSR-team, which consists of full-time staff dedicated to visit our suppliers, monitor and support them with various social and environmental topics.

As a member of BSCI, New Wave Group has adopted the BSCI Code of Conduct. It contains requirements on minimum wage, working hours and the prohibition of child labour, among several other requirements from international conventions like to ILO Conventions and the Declaration of Human Rights. New Wave Group has a commitment towards BSCI to engage our suppliers in third party examination by independent auditors. Having both internal and external audits is a quality assurance to us. We strive for constant improvements and continuous development.

New Wave Group is a signatory member of the pioneering Accord on Fire and Building Safety in Bangladesh. The Accord is a binding contract between brands, international and local trade unions and NGOs. Its aim is to make all garment factories in Bangladesh safe workplaces, which includes a program of safety inspections and a commitment to ensure that the necessary repairs and renovations are carried out. The Accord will have significant impact on the daily lives of millions of textile workers in Bangladesh. We are proud to be a part of this project.

## MORE ON THE ENVIRONMENT

New Wave Group has two main strategies to decrease our environmental impact and to cut our emission of greenhouse gases. First of all, we must influence the transportation companies that we are working with. Our membership in "Clean Shipping Index" aims to impact the shipping companies to use cleaner vessels by ranking the most high-performing ships. The Group works with some of the largest transportation companies on the market, all of which have environmental programs in place for their operations.

Secondly, we always strive to improve our internal logistics and work methods. Within our group of companies, we club together as much as possible of our shipments and transportations. In addition to protecting the environment, sustainable solutions can also contribute to the streamlining of our operations.

To learn more about our Code of Conduct and our sustainability work, please visit The New Wave Group's homepage.

## >> SAFETY CLOTHES

There are many rules that dictate the characteristics which safety clothes should have. They have to look a certain way and be of such a quality that the appearance is maintained wash after wash. ProJob safety clothes are designed in accordance with the demands of the user and the appropriate regulations. We have a wide range that offers several different combinations, so that you can dress differently for different occasions. The safety clothes can also be combined with many of our other garments. ProJob aims to develop products that suit everyone at a company. This is why we have put so much effort into designing safety clothes that meet all requirements and are available in all sizes. The trousers are available from a 29-inch waist and all jacket and rain clothes from size XS.

Definitions for the classifications on page 162.

Waterproof zipper AQUASEAL® from YKK.

### 6412 SOFTSHELL EN471 CLASS 3

## **5205 SHIRT**

Short-sleeved functional shirt without side seams, preventing chafing and irritation. The shirt is specially designed for optimal sleeve movement. Practical breast pockets with flaps and room for Inbags. Concealed vertical breast pockets with zipper that can be used as safety pockets. Press studs. Box pleat in back for freedom of movement.

Material: 100% cotton 210 g/m<sup>2</sup>

Colour: red-35, navy-58, graphite-94, black-99

Size: XS-XXXL

## **5210 SHIRT**

Functional shirt without side seams, preventing chafing and irritation. The shirts are specially designed for optimal sleeve movement. Practical breast pockets with flaps and room for Inbags. Concealed vertical breast pockets with zipper that can be used as safety pockets. Press studs. Box pleat in back for freedom of movement.

Material: 100% cotton 210 g/m<sup>2</sup>

Colour: red-35, navy-58, stone-83, black-99

Size: XS-XXXL

## » TRANSPORT AND SERVICE

ProJob invests great resources in transport and service. It is important to dress properly for every occasion. Many people drive lorries or delivery vehicles in regular trousers, but the lack of flexibility of these can lead to both irritation and wear. ProJob has developed service trousers with protection against wear, stretch material, with a representative appearance. These trousers are suitable for loading, driving and still look good when meeting with the recipient. ProJob workshop clothes are also made to cope with real life. They resist a lot of dirt, washing, wear and tear. The colour range is chosen to make stains as invisible as possible. ProJob Inbags make for ease at work, with the bags and belts easily attaching to transport and service clothes.

## 2515 SERVICE TROUSERS, WOMENS

Trousers without front pleat. Side pockets at the front, secure pocket with zip on right and key pocket with D-ring on left. Two back pockets. Two leg pockets. Left leg pocket has a flap and mobile phone pocket inside, loop for ID card holder and a pocket with zip. Right leg pocket has space for a mobile phone, pens, paper and folding rule. Internal knee pad pockets. Loops under back pockets and leg pockets for attaching Inbags.

Material: 65% polyester, 35% Cotton. 245g/m<sup>2</sup>

Colour: Navy-58, Black-99

Size: C34-C50

A full-body photograph of a woman standing with her hands in her pockets. She is wearing a dark blue polo shirt with white piping at the collar and cuffs, and dark blue cargo pants. The pants have multiple pockets, including a small chest pocket and two large side pockets with zippers. She is wearing black and yellow patterned sneakers. The background is a white brick wall.

**Slim fit**

Right pocket has space for mobile telephone, pens, paper and folding rule.

**Zipper**

## 2501 WAISTPANTS

Waistpants without front pleat. Side pockets in front, safety pocket with zipper on right side. Two exterior back pockets. Two leg pockets. Left leg pocket has flap and interior mobile telephone pocket. Right leg pocket has room for mobile telephone, pens, paper and folding rule. D-ring for keys, ID badge, etc. Interior knee protector pockets. Loops under back pockets and leg pockets for attaching Inbags.

Material: 65% polyester, 35% cotton 245 g/m<sup>2</sup>

Colour: navy-58, khaki-82, stone-83, black-99

Size: C44–C62, D84–D120, C146–C156

## » FLAME RETARDANT

Projob is forever evolving and becoming more advanced, and has now taken the next step by launching a collection of flame retardant garments. In this category you will find clothing made of materials especially developed to fulfill very high standards for flame retardant clothing.

When developing these garments we put optimum effort into creating shapes and designs that fit your body and at the same time allow you maximum freedom of movement in your daily work.

Our flame retardant garments live up to high-set standards and are all EN ISO 11612 certified. Most of them are also EN 1149-5, EN 13034, EN 61482 and EN 471 certified. Of course ProJob does it utmost to contribute to a sustainable development and thanks to our new flame retardant materials, we no longer need to use the type of chemicals otherwise associated with workwear. Instead, we use inherent flame protection materials that does not wash or wear off and so protects the environment and surrounding habitat.

You can find more flame retardant facts and information about certifications etc. on our website [www.projob.se](http://www.projob.se).

# CERTIFICATION

## ELECTRIC ARC TESTING, EN 61482-1-2:2007

Certified and approved garments suitable for use in working environments where there is risk of electric arcs.

The garments are tested according to EN 61482-1-1, the so-called box test where the arc is directed to imitate a real life situation. Class 1:4 a, class 2:7 a (voltage: 400V, arc duration: 500ms).

Electric arcs are responsible for about 40 % of all electrical accidents. An electric arc can reach temperatures of several thousand degrees. Inflammable materials around an electric arc are therefore easily ignited and cause fires.

In working environments and situations where there is risk of an electric arc, for example when operating switchgear and switchboards without sufficient safety features or when working close to a live section of a plant, it is therefore recommended that the staff wears appropriately tested protective garments.

The garments must be worn as an ensemble, for example jacket and trousers together with other protective equipment, to achieve the proper level of protection and there are specific design requirements. These garments are PPE Category III according to the PPE Directive. Annual inspection of the production is required and implemented by public agency.

## EN 1149-5:2008

Certified and approved garments to protect against electrostatic charges. Suitable for working environments where there is risk of explosion, for example in refineries.

The garments are tested in accordance with EN 1149-1 or EN 1149-3. The garments are EN 1149-5 certified.

This standard requires better safety against formation of sparks and therefore there are specific design requirements:

- The garments must permanently cover all materials that are not electrostatically protected.
- Additions such as labels and retroreflective stripes must be permanently attached. No loose hanging parts are allowed.
- Electrically conductive parts (zippers, buttons, etc.) are allowed if they are completely covered electrostatic protective material.

The garments must be worn as a full ensemble, for example jacket and trousers, to achieve the proper level of protection. Safety shoes are recommended.

## EN ISO 14116:2007 (EN 553)

Certified and approved garments to protect the user when in contact with heat and flames. Suitable for industrial workers and electricians.

The garment's resistance to flame and flame spread.

Index 1 = a, b, c

- a) No flaming or hole formation to top or side edge.
- b) No flaming debris.
- c) No afterglow.

## EN ISO 11612:2008 A1, B1, C1, (EN 531)

Certified and approved garments to protect the user when in contact with heat and flames. Suitable for industrial workers and electricians.

A1: The garment's resistance to flame and flame spread is tested and approved according to EN 531 or ISO 15025. EN 531 and EN ISO 11612 a1 are the same level.

B1: The garment's protection against convective heat is tested and approved according to EN 367 or ISO 9151. Convective heat means the heat that is transferred through the garment when exposed to flame. Injuries may occur due to the heat that builds up when the fabric and, indirectly, the body is exposed to the flame, even if the outer material cannot catch fire. Class B1 = 4-10 seconds.

C1: The garment's protection against radiant heat is tested and approved according to EN 366 or ISO 6942. Low radiant heat over an extended period of time may cause injury. The garment's heat transmission of radiant heat is tested. Class C1 = 7-20 seconds.

The garments must be worn as a full ensemble, for example jacket and trousers, to achieve the proper level of protection.

## EN 13034:2005, TYP PB\* [6]

Certified and approved chemicals protective clothing offering limited protective performance against liquid chemicals. Intended for use in cases of a potential exposure to low volume splashes.

Suitable for use in cases of potential exposure to small quantities of liquid chemicals, but where a complete liquid permeation barrier is no required.

The following chemicals have been tested according to EN 14325:

- Sulphuric acid H<sub>2</sub>SO<sub>4</sub>, 30 %
- Sodium Hydroxide, NaOH, 30 %
- o-Xylene, undiluted
- 1-butanol, undiluted

\*PB = Partial Body Protection

The garments must be worn as a full ensemble, for example jacket and trousers, to achieve the proper level of protection and have specific design requirements.

Welding sparks, flames and electric arcs are hard on any garment, but even harder on the human skin. The following pages show ProJob's collection of garments that protect against almost anything and are certified according to the latest European standards.

# MATERIALS

## MATERIAL

Flame-retardants are used to hinder materials from catching on fire or to limit flame spread, but they do not make the materials completely incombustible. There are different methods of flame treatment and different kinds of materials. At ProJob, we have opted for the latest technology where the flame protection is built into the fibres of the fabric. That is, it is not applied to the surface of the fabric as with regular flame treated garments. Therefore, it cannot be washed or rubbed out which makes the flame protection last longer.

Most of our garments are made of modacrylic, cotton and antistatic fibres. Upon contact with fire they release a gas that disperses the oxygen and the flames are smothered without afterglow. The flames do not spread outside the charred area and there is no flaming debris that may stick to the user's skin.

Undergarments and socks are made of wool and Lenzing FR®, a viscose fibre with inherent flame protection with the same qualities as mentioned above.

## INFORMATION

Flame treatment is used to prevent flames from spreading, not to protect the body against heat for a long period of time. However, a flame retardant garment can protect against heat a certain amount of time. If used in combination with flame retardant undergarments, this amount of time doubles. The garments must always be worn buttoned / zipped up and user protection is reduced if worn together with non-flame retardant garments. Before use, the user should check the garment for any damages. The user should also be aware of how to take the garment off quickly in case of accident.

We recommend welders to use a leather welding apron to protect the garments from welding sparks. A wet, dirty or sweaty garment provides inferior protection and the garments should therefore be washed often. A garment that has been exposed to flame is depleted and must be replaced. Any mending must be done using material with the same protective standard as the garment. Transfer printing and embroidery may affect a garment's protection. Consult the printer so that the protection is not compromised. Different professions have different protective needs regarding workwear and protective clothing.

## » RESTAURANT AND KITCHEN

It is a natural step for us at ProJob to launch a new line to the current range. When developing the Kitchen and Restaurant line we have focused on quality, function and design. As a compliment to our existing products in mixed fabric and cotton satin, we wanted to create a unique collection by combining new fabric with great comfort. The Kitchen and Restaurant products have been designed using breathable and functional fabric. Powered by the latest technology, NANO-TEX (read more on page 7); ProJob can offer you the necessary garments in the kitchen and restaurant environment. We take great concern in ergonomics and function and want the user to feel better so they can perform at their very best in their daily routines. As far as the design is concerned, we have complemented the classic white and checks with a camouflage color and pattern. This is not only to create a modern and bolder look but also enables the user to wear the clothes longer, even with stains on!

# RESTAURANT AND KITCHEN

ProJobs new exclusive chef jackets are developed together with Edin Dzemat, Head chef and MD at the prized gourmet restaurant Linnéa Art Restaurant in Gothenburg. He has formed and put his personal touch on the chef jackets when it comes to fitting and quality. Edin is a part of the Swedish Culinary Team and know what it takes to succeed in the kitchen, because he has got high demands on quality, function and ergonomics. ProJob is proud to present these exclusive chef jackets and we thank Edin for the collaboration.

### 7907 BUTTON ARRANGEMENT

Removable button band. Remove before washing

Material: 100% cotton

Colour: white-00

Size: XS/S, M/XL, XXL/XXXL

## >> FUNCTIONAL CLOTHES

ProJob's collection of functional clothes is designed in conjunction with sports brand Craft. Craft has a long history of making functional clothing of the highest quality and has used their expertise to design some of the Projob range. ProJob was pioneering in promoting the way of dressing properly for work according to the 3-layer principle, which you can read more about on page 114. By dressing properly, with ergonomic, functional and quality clothes, the carrier can stay more healthy and mobile; and this is a major benefit for him as well as his employer!

# Functional clothes by the 3-layer principle

powered by  
**CRAFT** 

The ProJob 3-layer principle has been developed in collaboration with Craft, one of the world's leading brands in sports clothes. In physical labour of all kinds it is important to keep dry and at the right temperature. With ProJob functional clothes you feel comfortable throughout the working day. The 3-layer principle enables you to regulate your body temperature yourself by taking off or putting on garments as changing weather or intensity of work demand.

## LAYER 1

Body and fabric work together in this layer. Underclothes let moisture and surplus heat from the skin pass through to the next layer.

## LAYER 2

Layer 2 is the link between the inner and outer layers. Revolutionary materials transport sweat through the fabric and out from the body. Layer 2 also has an insulating effect.

## LAYER 3

The protective shell conserves heat and keeps the effects of weather outside. Sweat evaporates due to the interaction of the garment, the body's movements and the air.

## POLYESTER

ProJob functional clothes are worn nearest the body. The material consists of skin-friendly, non-allergenic polyester with a unique capacity for leading moisture away from the body. In combination with a fit snug to the body, this means that you keep drier and that the body maintains a more pleasant working temperature, which is excellent for the most demanding tasks. Maximum ventilation properties. Flat-lock seams to prevent chafing. Good elasticity, soft and supple. Low pilling. Recyclable. Excellent for year-round use. Washable at 60°C. Certified by ÖKO-Tex.

## WOOL/POLYESTER

Active wool, for use in work at low temperatures. The material has a channel structure on the inside, which retains heat nearest the skin. The polyester fibres in the material, in combination with the fit snug to the body, lead moisture out from the body and spread it out on the upper wool layer. Superwashed wool on the outside makes for a material with great insulating properties that don't itch and always feel dry and warm. Flat-lock seams to prevent chafing. Good elasticity, soft and supple.

## MICRO

Micro (layer 2) is a material that is lighter and suppler than common fleece, yet still has high insulation and heating capacity. The Micro garments have a soft, brushed inside and a smooth, durable, ripstop-structured outside, where moisture evaporates rapidly. ProJob Micro is the same as Craft's proven Shift material.

## VENTAIR™

(ALLROUND OUTFIT/PULLOVER TROUSERS)

A wind and waterproof material with high moisture-transporting capacity and breathability. Easy to care for and durable. 3,000 mm water column and 4,000 mvp breathability.

## SOFT SHELL BY PROJOB

New, unique stretch material for increased mobility and optimal performance. Wind and water-repellent. Breathability for regulation of surplus heat. Heat-insulating.

PROJOS

**NEW**

### 3105 CREWNECK ADVANCED

Functional Crewneck with a Cool design. Close to body-form fit keeps fabric in contact with your skin. Elastic for optimal movement. Bodymapped climate zones guarantee excellent body temperature for maximum performance. Seamless torso preventing chafing and irritation.

Colour: red-35, navy-58, khaki-82, graphite-94 black-99

Size: XS-XXXL

## » THE INBAG SYSTEM & ACCESSORIES

It was the idea of a more flexible and ergonomic carrying system that gave birth to ProJobs Inbags. We know from our own experience how important it is that the weight of tools is distributed properly over the body. Also of great importance is mobility. When you find yourself in a heavy, tough and at times dangerous situation, nothing must keep you from moving freely. Bag pockets in different sizes, configured for different needs, are easily transferred from shirt and trousers pockets to the trousers belt, toolbelt or tool pouch. ProJobs Inbags can be combined with all of the series in our range. ProJobs Inbags provide optimal flexibility and keep your things in order.

**1001 MATERIALS INBAG**

An Inbag for accessories such as nails, screws and odds and ends. Perfect for when you need to replace nails or screws quickly and easily.

Material: 600d Oxford nylon

Size: ONE SIZE

**1002 SMALL MOBILE INBAG**

Small Inbag for a mobile telephone/cordless office telephone and a pen. Has a small compartment for a headset.

Material: 600d Oxford nylon

Colour: black-99

Size: ONE SIZE

**1003 MOBILE INBAG**

Inbag for pens, a mobile telephone/cordless office telephone and pocket torch or marker pen. Has room for A6-size paper.

Material: 600d Oxford nylon

Colour: black-99

Size: ONE SIZE

**1005 TOOL INBAG**

Medium-sized tool Inbag with room for a knife, a folding rule, screwdrivers, pliers, etc. A foldaway strap keeps the tools in place.

Material: 600d Oxford nylon

Colour: black-99

Size: ONE SIZE

**PRO  
JOB**

### 1201 BASE CASE

Base case for Inbags, tools, paper, etc. It's easy to attach your Inbags, turning the case into a stationary tool holder. The case is also perfect as a normal work bag.

Material: 600d Oxford nylon

Colour: black-99

Size: ONE SIZE

### 9029 BAG

Bag with room for most things. Separate ventilated shoe compartment. Detachable shoulder strap. Key compartment. Mobile etc.

Colour: Black-99

Size: ONE SIZE

## **1101 DOUBLE BELT**

Double belt for the trouser waistband. The pocket bags can be hung from the outer belt and slide to any position.

Material: 600d Oxford nylon

Colour: black-99

Size: ONE SIZE

## **1102 PADDED BELT**

Padded outside belt for Inbags. Has fixed positions for pocket bags, both hinged and tight against the belt. You can quickly and easily construct your own toolbelt.

Material: 600d Oxford nylon

Colour: black-99

Size: ONE SIZE

## **9036 VELCRO BELT**

Leather buckle belt, ideal for the car industry and coating plants. Velcro adjusted.

Colour: Black-99

Size: XS-S (117cm), M-XL (130cm), XXL-XXXL (147cm)

### 9004 LEATHER BELT

Belt in thick naturally tanned leather with metal buckle

Material: 100% Leather

Colour: Black-99 with silver buckle

Size: ONE SIZE

### 9001 STRETCH BELT

Elastic belt that follows the movements of the body. Buckle with bottle opener.

Material: Polypropylene, elastane

Colour: black-99

Size: ONE SIZE

### 9020 BELT

Belt with a bottle opener on the metal buckle.

Material: 100% Polyester

Colour: Black-99 with silver buckle

Size: ONE SIZE

## **9027 LONG TECHNICAL SOCK**

Swedish-made long woollen sock that fits perfectly in shoes or boots. Nanoglide to minimise friction and avoid the risk of sores and blisters. Lycra in leg so that the sock doesn't fall down. Right and left sock for optimum fit.

Material: 60% Wool, 36% Polyamide, 3% Nanoglide™ 1% Lycra

Colour: Grey- 95, Black-99

Size: 36-39, 40-45, 46-48

## **9028 TECHNICAL SOCK**

Swedish-made sock in Dri Release R. Dri Release R is a unique material with a cotton feel which makes the sock comfortable, dry and odour-free. Nanoglide to minimise friction and avoid the risk of sores and blisters. Lycra in leg so that the sock doesn't fall down. Wide grip-top to avoid pressure on the shinbone. Right and left sock for optimum fit.

Material: 52% Dri ReleaseR, 42% Polyamide, 4% Nanoglide™, 2% Lycra

Colour: Grey- 95, Black-99

Size: 36-39, 40-45, 46-48

## **9012 TERRY SOCK 7 PACK**

Supple work sock in semi-terry cloth. Knit from a mixture of cotton and polyamide for optimum durability and comfort.

Material: 80% cotton, 15% polyamide, 5% elastane

Colour: black-99

Size: 36-39, 40-45, 46-48

### 9015 BALACLAVA

Made of stretch microfleece for perfect fit and climate control.  
The right choice under the helmet on a cold and windy day.

Material: 100% polyester

Colour: black-99

Size: ONE SIZE

### 9014 FLEECE CAP

A cap in laminated fleece. Double layers around neck and forehead. Adjustable with stoppers. Wind and water-resistant and breathable.

Material: 100% polyester

Colour: black-99

Size: ONE SIZE

### 9017 KNITTED CAP

Knitted cap with coolmax lining

Material: 100% acrylic

Colour: black-99

Size: ONE SIZE

### 9018 KNITTED CAP

Knitted cap with Windstopper and knitted reflectors.

Material: 70 % Acrylic, 30 % Wool with piumafil lining.

Colour: black-99

Size: ONE SIZE

### 9007 CAP KNITTED

Knit chimney-sweep cap.

Material: 100% acrylic

Colour: grey melange-95

Size: ONE SIZE

# NEW

## 9037 BEANIE

Cap in single jersey with matching flatlock stitching.

Material: 95% Cotton, 5% Spandex (Black)  
Colour: 10 ProJob Yellow, 17 Orange, 99 Black.  
Size: One Size

### **9013 SAFETY CAP**

Cap with pre-bent brim. Adjustable reflector Velcro in the back.

Material: 46% polyester, 54% cotton

Colour: ProJob-yellow-10, orange 17

Size: ONE SIZE

**NEW**

### **9038 LINED BEANIE**

Cap with fleece lining in single jersey with matching flatlock seams.

Material: 95% Cotton 5% Spandex (Black)

Colour: 10 ProJob Yellow, 17 Orange, 99 Black

Size: One Size

### **9026 MULTISCARF**

Stretch multi scarf. Multiple areas of use, for example around the neck or as a hat.

Material: 100% polyester.

Colour: Black-99

Size: ONE SIZE

### 9019 PRO GENERATION CAP

Washed cotton twill cap.

Material: 100% cotton

Colour: black-99

Size: ONE SIZE

### 9008 BASEBALL CAP

ProJob cap with room for company logo. With elliptical cushion preventing pressure pain.

Material: 100% cotton

Colour: light grey-93

Size: ONE SIZE

### 9039 Zippuller 10-Pack

Zippuller packed 10 pcs in one color per bag

Color: White-00, Yellow-10, Orange-17, Red-35, Grey-98, Black-99

Size: One Size

## **9032 ID CARD HOLDER 5-PACK**

To be attached with a carbine hook or brace clips. Sold in 5-pack.

## **9035 ID CARD HOLDER**

Soft ID card holder

Material: Cordura®

**CORDURA®**

## **9024 HANGPOCKET**

Detachable hanging pocket for tools, nails and other equipment. The right pocket is divided into two sections, one with three compartments and strong polyester tool bands. The left pocket is equipped with two sections

Material: 100% cotton 330 g/m<sup>2</sup>

Reinforcements: 100% polyamide, Cordura®

Colour: white-00, ProJob blue-56, black-99

**CORDURA®**

### 9033 ERGO KNEE PROTECTOR 11 MM

Ergonomic knee protector for when you want to look out for your knees. Recommended by many experts in ergonomics and occupational health.

Material: GelFoam

Colour: black-99

Size: 20x14x1.1 cm

### 9030 ERGO KNEE PROTECTOR 22 MM

Ergonomic knee protector for when you want to look out for your knees. Recommended by many experts in ergonomics and occupational health.

Material: GelFoam

Colour: black-99

Size: 20x14x2.2 cm

## **9050 ERGONOMIC KNEEPAD**

A shaped kneepad based on the human knee, which keeps it in place and size. The smooth shell keeps the kneepad from clinging to the pants. The material used has been recommended by experts within the ergonomics and company health care areas.

Material: GelFoam  
Colour: ProJob blue-56

## **9056 ERGO KNEE PROTECTION EN14404**

Ergonomic curved knee protector. Conform to the European Directive 89/686/CEE following the EN 14404+A1:2010 official tests.

Material: PE  
Safety Class EN14404 level 0  
Colour: 56 ProJob Blue

BASIC

## 2599 WAISTPANTS BASIC

Waistpant without front pleat. Side pockets on both legs and two back pockets. On the right leg even a pocket adapted for folding rule. Leg lengths are adjustable, by untack the red thread at the ankles the leg length can be extended 5 cm.

Material: 65% polyester, 35% cotton. 245g/m<sup>2</sup>

Colour: black-99, marin-58

Size: 42-62 (142-162)

## 9599 PROTECTIVE SHOE BASIC

Safety shoe with non-penetratable sole and protective toecap.  
(EN 345 S1 P)

EN 345 S1 P

Colour: black-99

Size: 36-47

# Choosing the right size

Size is extremely important when it comes to work clothes – it affects function, wear and ergonomics. ProJob clothing is designed with flexibility in mind. Clothes that are the wrong size prevent the wearer from moving around freely. Pockets and other functional details which are used repeatedly during the working day need to be positioned where they can be reached easily. If the clothing is the wrong size, either the positioning of the pockets will force the wearer to make strenuous movements, or the pockets will serve no purpose at all. It's also extremely important for the knee protectors to be in the right place to prevent unnecessary wear. The size also affects how long clothes last – the tighter the garment, the greater the strain on the seams and the fabric.

The ProJob collection includes sizes to meet every need. Almost all our tops are available in XS–XXXL and almost all our trousers are available in C44–C62, D84–D120 and C146–C156 (see Size Guide for details).

# Safety clothes information

Reflective clothing is personal protective equipment.

Personal protective equipment are products that are designed to be used by a person for protection against health and safety risks.

The special demands placed on personal protective equipment in Europe are described in EN-norms.

Products that pass these basic safety requirements are allowed to carry the obligatory CE-mark. In order for a safety product to be approved and marked with the CE mark, it must have been tested and certified by an authorized organisation.

## HIGH-VIS CLOTHES FOR PROFESSIONAL USERS

These have to be CE-marked and approved according to the norm EN 471. The norm describes among other things what colours are permitted, where on the clothes the reflecting material is to be placed, and which information that must accompany the clothes. The design of

the clothes must also follow certain criteria in order to achieve the best possible visibility. In the norm there are three classes. The norm specifies how much fluorescing cloth and how big the reflective area reflective clothes of each class must have.

### CLASS 1

This gives the lowest level of protection. The total fluorescent area must be at least  $0.14m^2$  and the reflective area  $0.10m^2$ . May only be used if there is little contact with a few vehicles and/or slow moving traffic.

### CLASS 2

Gives a much better protection than class 1, especially in daytime, twilight and fog. The total fluorescent area must be at least  $0.50.14m^2$  and the reflective area  $0.13m^2$ . Class 2 is used in harbours, on railways, building sites, parking places, cross country searches, load bearing vehicles and other places where class 3 is not required.

### CLASS 3

This gives the highest level of protection. The total fluorescent area must be at least  $0.80m^2$  and the reflective area  $0.20m^2$ . To be used in the proximity of fast moving traffic.

The rules for reflective clothing are applicable to any place of work where there is some form of traffic, roads, parking places, airports, harbours, building places, mines, etc. In Sweden for example, the employer is required by the worker protection laws to supply personal protective equipment if this is needed, and often it is the employer/work provider that decides the safety class that is applicable on their work site.

### EN 471 / EN ISO 20471

EN ISO 20471 is the latest update of the norm, since this came, garments can no longer be certified according to EN 471. Therefore all new products are certified under the new norm. ProJob working to gradually update all High Visibility garments in the collection according to the new standard. EN 471 is still fully approved to use and will be so for many years to come.

# Washing guide and care instructions

## WASHING

All our garments are properly tested. Each of our garments has its own washing instructions, and it's important to follow these. If a garment is always washed with similar colours and at the recommended temperature, it will stay looking good for longer. "Wash separately" in the washing instructions means that the colour of the fabric may run – for these garments, which may initially have a little extra dye, it is particularly important to follow the washing instructions.

## PREWASH

Use the same amount of detergent as in the main wash cycle when prewashing very dirty clothes, but skip the prewash cycle completely for less dirty garments. Soaking garments is not recommended due to the damage which undissolved detergent can do to fabrics.

## DETERGENT

Always be sure to use the correct amount of detergent – see the detergent packaging. Choose a bleach-free detergent which is suitable for the temperature of the wash.

## DRYING

Only tumble dry as a last resort – if you have enough

time and space, hanging garments out to dry is recommended as this is better for your clothes. Smooth out the fabric and the seams before hanging up a garment. When tumble drying, the garment should never be completely dried, as this causes unnecessary wear and can cause shrinkage.

## SHOES

Store the clean shoes in a dry and ventilated area when they are not being used. Make sure that the shoes are intact before each time of use. Clean regularly, using a brush, rag or similar. Treat the leather regularly by using a suitable, for example, grease, wax or silicon based shoe polish. Do not use aggressive products (petrol, acids, solvents etc.) that can jeopardise the quality, safety and durability of the personal protection devices. Do not dry the shoes close to or in direct contact with fireplaces, central heating systems or other heat sources.

Shows the recommended wash temperature

Do not tumble dry
